dent of his personal support of the entire adminis ration programme, as outlined, reserving freedom to fight for certain substantial increases over the president's plans for both the army and navy, but not committing himself to details not yet worked out. He also as sured Mr. Wilson that there would be no attempt by the Republican Senators to make a partisan issue of the question, provided the administration did not frame a caucus measure, and then present it to the Republicans to be swallowed whole.

The Republicans, a canvass this afternoon showed, are far from being agreed on the details of the prepared most plans, though the, are strongly infavor of a vigorous poi'cy. The majority are especially dubious of the wisdom of the Garrison continental army plan, though a few, of whom Mr. Gallinger is one, believe it deserves a trial. They generally agree that the Garrison plan does not provide for sufficient strength in the regular army, Many of them believe that the minimum standing force should 'e 250,000 men.

"The chief change for which I am likely to fight in the army plan is for more men in the standing army—a good many more men. I think the continental army plan is worth a trial. While there will be friction between the militia supporters and the advocates of the continentals. I have grave doubts whether the national guard can ever become a sufficient force and be available promptly enough. There are weaknesse in the contine tal plan, but on the whole I believe it worth trying.

Receipts for the same year based on existing law, without extension of the sugar duty or the emergency tax, Mr. McAdoo puts at \$580, 200,000, and ordinary disbursements at \$832,901,000, leaving an excess of disbursements over receipts, if legislation is not passed to change conditions, of \$252,701,000. As explained in his recent tatement, however, that amount would be reduced to about \$50,000,000 by the extension of the emergency and sugar tax laws.

Secretary McAdoo's report says the neople of the United States have reason to congratulate themselves on the financial and business condition of the country after the serious situation which confronted them a year ago.

country after the serious situation which confronted them a year ago.

"The European war produced inevitable suffering in this country as well as in Europe," said the Secretary. "Our industrial situation was for a time seriously hurt, and the cotton growing states of the South sustained heavy losses through declines in the price of cotton. Every power of the government was exerted to mitigate the situation, and I believe it is not inexact to say that but for the active agency of the government in protecting and conserving the business interests of the country during that critical period grave disaster would have resulted.

"It is a pleasure to acknowledge that the efforts of the government were seconded and supported by the earnest and patriotic cooperation of the business interests of the country. During the year there has been a steady, healthy, forward movement in every line of activity, until now prosperity has been firmly established through out the country."

Mr. McAdoo included letters from mercantile agencies to support his statement, and quoted figures on rail-

The method of legislating for public buildings in an omnibus bill received the Secretary's disapproval, and he asked that it be discontinued. Needless waste of public money, he said, will be avoided if Congress will hereafter not authorize the acquisition of public building sites until authorization is made for the buildings to go on the sites. He asked that the Secretary of the Treasury be authorized to fit the building to the city, and not to make it just as imposing as the sum appropriated under the present system will permit.

Mr. McAdoo asked for two cruising cutters for the coast guard service on the Pacific Coast, to cost \$700,000; a harbor cutter for New York, to cost \$125,000, And one for San Francisco, to cost \$50,000. He says that in plans for national defence the coast guard will have important assignments and that authorizations for the service will be valuable from a military standpoint.
